Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 9-10, drawn to a cathode composition comprising a lithiated cathode and a lithium compound additive.

Group II, claim(s) 7-8, 11-12, drawn to a cathode composition comprising a metal compound additive.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups 1-11 are totally two different inventions. They lack the same or corresponding special technical features.

3. During a telephone conversation with Mr. Zachary Wobensmith on 7-20, 2007, a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6, 9-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-8, 11-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 1745

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

5. Claims 9-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim such as claims 3 and 5. See MPEP § 608.01(n). Accordingly, the claims 9-10 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Xue (5,928,812).

Art Unit: 1745

Xue teaches in column 8, a cathode comprising 64.7 wt% of LiMn_2O_4 , 2.0% Li_2CO_3 , 12.2 wt% PVDF-HFP, 5 wt% carbon black and 16.1 wt% plasticizer.

8. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Endo et al. (6,022,641).

Endo et al. teaches in column 2, incorporating a specific amount of an alkali metal carbonate 0.5-20% by weight into the cathode comprising manganese oxide or lithium-manganese complex oxide is known. Endo et al. teaches in columns 7-8, Examples 1-4, a cathode comprising lithium-manganese composite oxide, Li_2CO_3 , a conductive graphite material, a binder of polyvinylidene fluoride and dimethylformamide.

9. Claims 1-3, 5-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Zhang (US 2002/0119375).

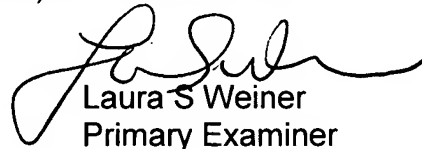

Zhang teaches on page 3, Example I, a cathode comprising LiCoO_2 treated with 0.1 wt% and 0.15 wt% LiBO_2 .
